Safety precautions and installation instructions

The instructions below are intended to make it easier to of the parasol, guaranteeing its longevity and ensuring user safety.

- Before opening, the parasol pole must be held in place. in its base
 - When you first use it, in order to help with its opening, grasp the ribs at the ends and open them progressively at the same time.
 - Take the cord, pull and insert the locking pin in 1 of the 3 lower positions (6 positions in total). The upper holes will be used to adjust the tension of the canvas over time.
 - Once the pin is in place, the sunshade is locked in position. open position. Wind the cord into the hollow of the the pin intended for this purpose.
 - To close the parasol, keep the cord stretched, remove the pin and pull the cord loosely until until the armatures are completely closed.
 - It is advisable to use a protective cover.
- If there are few parasols on a terrace, a minimum distance of 20 cm between 2 umbrellas must be respected. The same applies between a wall and a parasol.

POLYESTER CANVA 250 G/M2

Précautions d'usage

POLYESTER fabric 250 g/m2 is guaranteed to last lasts 2 years, but can be extended if the maintenance below are respected

Maintenance advice

GREENWICH canvas is made from 100% natural fibre. mass-coloured polyester.

It has a surface treatment that guarantees 90% water repellency, allowing water to penetrate slide across the canvas.

(on a daily basis or during storage), negligence, or light rains, it can't completely combat against large quantities of water and does not protect your umbrella in the event of heavy rain. In this case, it is necessary to enter your parasol in order to protect it and prevent the development of moulds.

This finish is destined to disappear over time.

To increase the longevity of your fabric, maintenance is essentials to prevent the accumulation of pollution atmospheric conditions of all kinds.

1. Brush off excess dust and dirt using a brush. a soft bristle brush
NEVER use a brush with hard bristles
2. Wet the fabric with a low-pressure jet of water.
3. Apply neutral soapy water to the canvas. (no more than 60°C). Allow to penetrate into the fabric.
4. Rinse thoroughly with water to remove soap from the skin its entirety.
5. Allow to air dry. Never close the parasol if the canvas is not completely dry.
6. NEVER use cleaning products with a chemical base. solvents or dissolvents that can damage the protective finish of the canvas.
7. Do not store any objects on the canvas, and avoid any any contact with it objects falling on it.
8. In the event of unusual weather conditions (lightning, storms, etc.), close your parasol securely and store it in a safe place.
